## INTRODUCTION

SEBA is a skater-owned brand, celebrating it's 10th anniversary!  
 Since 2005 and for good, SEBA is spinning wheels:

The SEBA team has been committed without boundaries since the beginning. The target has always been to promote and develop inline skating as a sport, a hobby or even an art.

Our products are tested and improved in real skating situations by the best skaters. SEBA is also supporting skaters and events all over the world and is proud sponsor of the World Slalom Series and World Skate Cross Series. Seen as a young innovative brand when the first SEBA skates came out in 2005, SEBA is now the leading brand of the Freestyle / Freeride market and our innovations set the trends of the inline skating industry.

Sébastien Laffargue started skating when he was a kid in Paris, and entered his first competitions in 1996. He took part and won many of them, including the biggest ones, but became

famous worldwide thanks to his internet videos showing a new way to do freestyle tricks and a stylish ride. He practiced many different kinds of inline-skating, giving him the knowledge of how all different kinds of skates should work, and be produced: Freestyle and speed slalom, road and bobtracks inline downhill, skate-cross, freejump, slides, freeride and even speed skating. A new era for the inline industry began when the first pair of Seba skates came out in 2005. The first dedicated Freestyle-Freeride brand was born.

Sébastien and his team keep developing the best possible innovative products for everyone and for you to show your talents, elevate your skills and express yourself as you wish.

By using SEBA skates, you are supporting your community. What you spend for SEBA products will contribute to the progression of your

sport/activity with events you can join, disciplines you can try, riders you can admire and who can inspire you.

Our aim is to let you freely live your skating dream, be a part of the skater's community and invite you to show what you are now able to do with your SEBA skates.

SEBA products are designed to be used, and every small detail has the purpose of giving you a fun ride and easiness to perform your tricks. DEDICATION is the key word for our story, we will continue to change things and to bring innovation.

Now it is time for you to wear your skates and show what you can do!

The freeride revolution is still in effect.  
Each detail of the skates is subject to a particular  
attention, so you can trust your skates when you  
need reactivity while enjoying a great comfort.

# FREERIDE

Antony Pottier: WSX World Number 3

## Jump into the future of freeride with the SX skates!

The Future of Freeride is already available, by SEBA! The UFS compatible boots and frames will enhance custom possibilities & multiple ride expressions. This skate will undeniably influence the next generation of freeride skaters.

### SX

Igor Cheremetieff

Pro model skate of Igor Cheremetieff, former world n°1 slalom skater and international coach

**Igor Cheremetieff's word:**

» I wanted this skate to reflect my skating style. Its stiffness lets you skate well in any discipline. The tightening system on a full carbon boot brings precision, reactivity and a great weight vs durability ratio, which are absolutely needed for practicing Freestyle at the TOP level. This new version is a little more sober, and we worked a lot on the fitting. Will you be strong enough to skate it 100% of its skills? «

**WFSC**

- Ref: SSK-WFSC

# PROJECTS & SPONSORING

SEBA has always supported inline-skate events, helped develop our sport, and is always creating new events/contests for the skating community. We are a proud sponsor of the World Slalom Series and the World Skate Cross Series, the official freestyle and freeride world tours. SEBA & it's team members are all involved in the development of inline-skating. A percentage of all SEBA sales are donated to the WSSA (World Slalom Skaters Association) to help the development of freestyle skating all around the world.
