

# ITEM: FLEXFIT PADS PROTECTOR SETS

# PLEASE READ THE FOLLOWING INFORMATION BEFORE **USE AND RETAIN FOR FUTURE REFERENCE.**

#### LEVEL OF PROTECTION: (EN14120:2003 + A1:2007)

- LEVEL 1 Protectors intended to be suitable for normal roller sports.
- LEVEL 2 Protectors intended to be suitable for use in acrobatic roller sports.
- These protector pads are suitable for users of cycles, scooters, skateboards, rollers skates and in-line skates.
- These protector pads are not intended to provide protection in the occurrence of a serious fall when travelling at speed of excess of 13km/h (8mph). The protector pads will also only offer limited protection in the event of low velocity impact with stationary hard surfaces.
- These protector pads will not protect the wearer in the event of a collision with moving vehicles.
- These protection pads are not suitable for use on motorcycles or in motor vehicles. They are not suitable for acrobatic or high-speed skateboarding and skating.
- DO NOT make any modifications in any way that may impair the safety of the product.
- To reduce the risk of injury, skate/ride sensibly and within your own ability. Also factor in the conditions of where you are skating/riding; such as the weather.

#### **WARNING:**

- · Changes in environment conditions, such as temperature, can significantly reduce the performance of the protector.
- No protector can offer total protection against injuries.
- · Contamination, modification to the protector, or misuse can dangerously lower the functionality of the protector.
- Substances in the main components: Foam Padding and Neoprene Fabric.
- Expected service life of the protectors is approximately 2 years.

## FITTING:

- · Always wear the protectors on the correct area and/or side.
- Fit the elbow pads so the point of the elbow fits securely into the centre of the elbow pad.
- · Make sure the knee pads are placed over the centre of the kneecap.
- · Wrist pads should be fitted so that the crash plate protects the palm and wrist.
- · Check that the straps are fastened tight enough to prevent the pads from moving during use. The pads should not move from the part of the body they are protecting. Straps should fit comfortably and not restrict the circulation of blood.

#### **MAINTENANCE:**

- · Before and after each use, check the protectors for any damage. The protectors should be discarded and replaced if any of the following incur:
  - If the protectors no longer fit or cover the intended areas.
  - If the straps no longer fasten properly.
  - If the straps have become overstretched/lost elasticity, torn or abraded.
  - The shell shows damage like denting, cracking, deep scratches or discolourations.
  - If the padding underneath the shell is compacted, holed or deteriorating.
- · Always re-check your protective equipment after a fall.
- DO NOT store in direct sunlight and keep away from any heat sources. Excessive sunlight/heat may cause damage.
- · Always clean with a damp cloth and mild detergent. DO NOT use industrial cleaners/solvents, alcohol/alcohol-based/ammonia-based, paints or abrasive, as they can cause unseen damage to the pads and reduce the ability to protect the wearer.
- Allow your protectors to dry after use or cleaning them.
- · Adult supervision is recommended when putting the protectors on.
