BAZOOKAGOAL™

PRODUCT SPECIFICATIONS

High-tech materials. Patented functionalities. Award-winning design

The compact solid frame is made from premium quality composite materials, making the BazookaGoal durable and long lasting. The patented telescopic function enables it to fold into a super compact size and the net becomes the carrying bag with shoulder strap for total portability. The patented spring-coil system allows the frame to flex on impact, thus removing the need for ground pegging and makes it safe for even the youngest of players to fall on.
